About AET ATAK

AET ATAK provides electrical, engineering and construction contracting services for residential, commercial and energy projects. We assess each project's technical requirements in light of the building's intended use and coordinate the teams from planning through site installation.

Our mission

Identify technical requirements accurately, prioritise occupational safety and monitor workmanship at every stage. We work closely with clients and site teams to develop solutions suited to each project.

Our vision

Be a trusted partner in electrical, engineering and construction contracting. Develop our services through projects that prioritise energy efficiency, ease of maintenance and a long service life.

Services

Electrical and mechanical contracting for business centres, shopping centres, hotels, resorts, supermarkets, hospitals and residential buildings.

Energy and electrical

- Low- and medium-voltage infrastructure
- Power transmission lines
- Medium-voltage switchgear and substations
- Diesel generators and UPS systems
- Distribution and power panels
- Power distribution and busbar systems
- Cable, floor and perimeter trunking
- Underground cables and routes
- Electrical works at energy facilities

Lighting and controls

- Smart building systems and controls
- Automatic control and command systems
- Indoor, outdoor and specialist lighting
- Architectural, façade, site, road and border lighting
- Club lighting and sound systems

Mechanical systems

- Plumbing and sanitary systems
- Heating and ventilation
- Fire protection and natural gas systems
- VRV/VRF and air-conditioning

ELV and security

- Telephone and public address systems
- Fire detection and alarms
- Simultaneous interpretation systems
- Wide-angle projection systems
- Card access and security systems
- Data distribution and networks
- Audio and video door entry
- Satellite and central TV antenna systems
- CCTV and camera systems

Engineering and construction

- Technical requirements and scope assessment
- Planning, site team and schedule coordination
- Data centre installations and cabinet layouts
- Cable management and connections
- Site and infrastructure works for homes and commercial buildings
- Technical compliance, quality and safety monitoring

Enez District Governor’s Office

Architectural façade and site lighting. Night photographs show the building’s façade and surrounding lighting.

Edirne Enez Border Lighting

Smart lighting and camera systems along 4.5 km of the border. Photographs show installations along the route.

Edirne Enez Border Lighting · Night

Aerial night view of the 4.5 km border lighting route.

Night-time Site Lighting

Night photograph of site lighting.

Energy and infrastructure

Çeşme Alaçatı Wind Farm

Equipment installation and electrical works at the wind farm.

Çeşme Alaçatı Wind Farm · Electrical Infrastructure

Archive images of cable and switchboard installations at the plant.

Medium-Voltage and Transformer Installations

Selected medium-voltage installations, transformer equipment and cable connections.

Emlak Konut Dursunköy Phase 2

Site works and cable routes for the medium-voltage infrastructure.

Emlak Konut Dursunköy Phase 2 · Site Gallery

Cable conduit installation, excavation and backfilling along the route.

Underground Cable Infrastructure

Cable routes, excavations and connection points from several sites.

Data Centre and Network Infrastructure

Data centre cabinets, network infrastructure and cable management installations.

Ataşehir TOKİ Phase 3

Aerial photographs of the residential construction site from several angles.

Ataşehir TOKİ Phase 3 · Site Gallery

Four aerial photographs showing the site layout and residential blocks.

Esenler TOKİ

High-resolution aerial photographs of the construction site and its surroundings.

Yalçıntepe Maximoon

Project visuals showing the residential buildings and landscaping.

Yalçıntepe Residence

Architectural rendering of the residential blocks and ground-level surroundings.

Anka Evim Kadıköy

Daytime and night-time project visuals of the residential blocks.

Eroğlu Construction · Yaşar Suits

Architectural rendering and photographs taken during construction.

34 Levent Inn

Exterior view of the residential development.

Photo: Yeni Projeler

Ünal Construction · İkitelli Business Centre

Façade design for the Istanbul Inn İkitelli project.

Edirne Oral and Dental Health Centre

Exterior view of the Edirne Oral and Dental Health Centre.

Photo: Hastanelerim.com

Mehmet Ruşen Erkurt Middle School

Front elevation of the school and its courtyard.

Photo: the school's official website
